

❖ School of Business and Management Launches Master of Science in Healthcare Management

Thomas Edison State University's School of Business and Management has launched its Master of Science in Healthcare Management (MSHCM) degree program, designed for individuals who wish to work in or are currently working in the healthcare industry.

"The MSHCM degree integrates key healthcare industry content in program management, data analysis and federal and state medical policy with core business course work in management, organizational behavior and entrepreneurship," said Dr. Michael Williams, dean, School of Business and Management at the University. "The degree curriculum

emphasizes critical thinking, data analysis and strategic decision making, enabling graduates to contribute to and lead in healthcare related organizations." Williams asserted that, "the MSHCM degree tracks to key developments in the global healthcare industry enabling it to maintain relevance and currency, in turn providing students with a competitive advantage in the healthcare marketplace."

Central to this 36-credit graduate degree program are courses in leadership, human capital management, finance, technology and quality improvement all focused on creating value, managing and leading effectively in healthcare organizations.
